THEME 4 - Pitch Presentation

STACK

Building the studio's missing front door.

A conversion-focused portfolio website that turns scattered proof into trust, clarity and inbound leads.

Enzo De Vittorio

Student no. 231244

Creative Practice 410

A real studio that doesn't yet look like one online.

WHAT STACK STUDIO IS

A small Centurion web studio building brand-led, cinematic websites and digital products.

Web design + development · hosting · basic SEO / analytics.

REAL CLIENT WORK

GC SOLAR

MPG FOUNDATION

WHY I CHOSE IT

01 **Personal, but professional**
A real client-facing use beyond assessment.

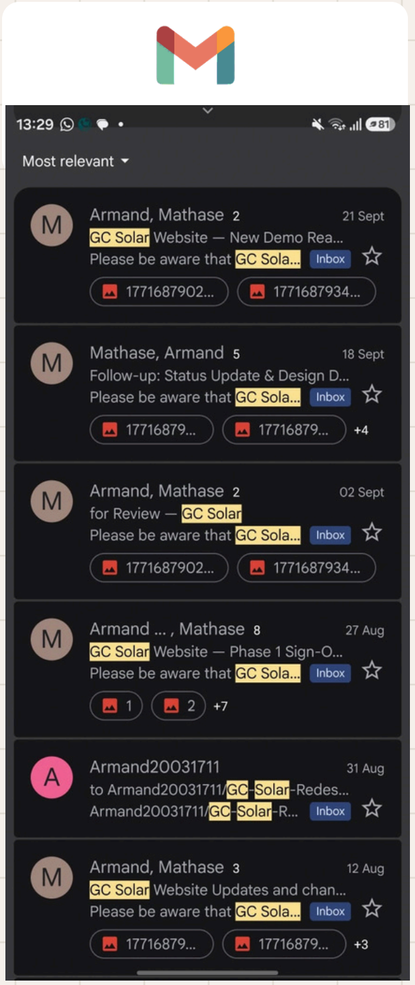

02 **The gap is visible and fixable**
One strong owned touchpoint changes a lot.

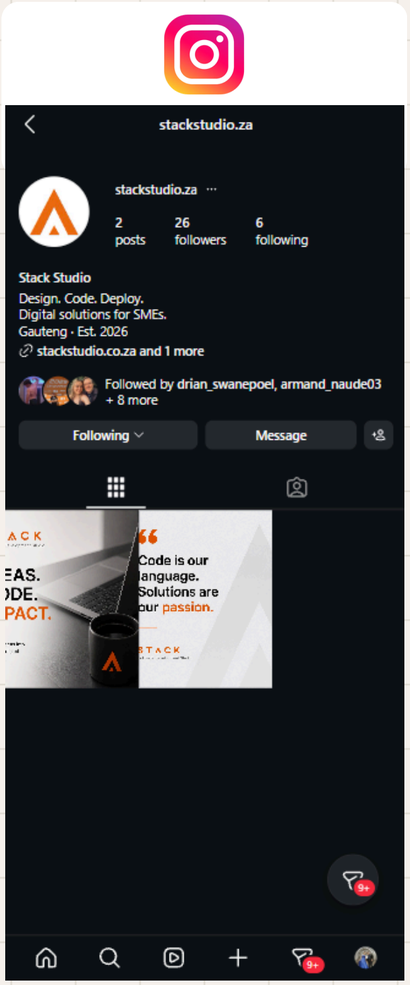

03 **It matches my strengths**
UX/UI, interaction, motion and front-end in one build.

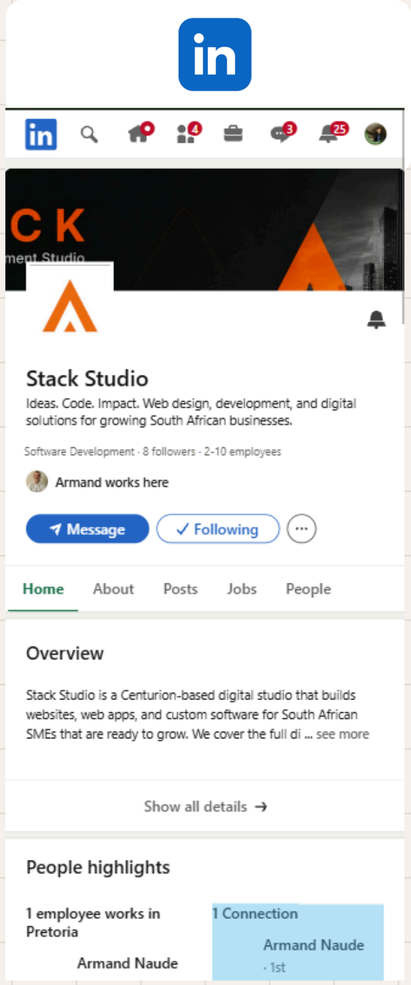

02 · THE GAP

We sell websites, but don't have one that proves how we build them.

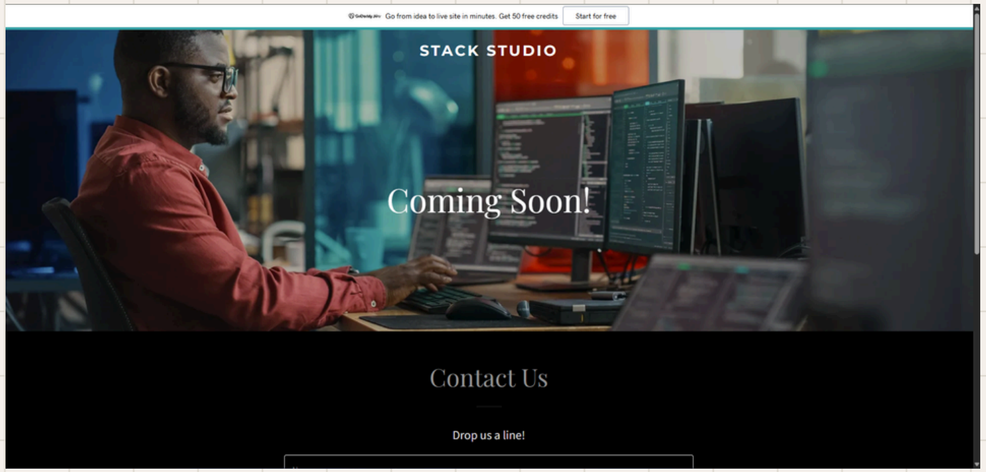

WHAT EXISTS NOW

→ NO OWNED PROOF PLATFORM

THE GAP

Fragmented communication and no owned proof-of-work platform. Clients must ask for examples, process and pricing instead of discovering it themselves.

The job isn't “make a website”. It's to remove four moments of doubt.

01

FIND

Who are you?

›

02

TRUST

Can you actually do this?

›

03

UNDERSTAND

What do I get, and roughly what does it cost?

›

04

CONTACT

How do I start?

The site becomes the missing front door: one place to build credibility, show proof and capture a lead.

A conversion-focused interactive website for Stack Studio.

01
Selected Work
Real case studies: GC Solar + MPG Foundation

02
Services + Process
What we do, and how a project runs

03
Price Guidance
Starting points instead of hidden pricing

04
Enquiry Flow
A short guided brief, not “send an email”

05
Motion System
Subtle interaction that signals craft

NOT A REBRAND

The Stack identity stays. I build the digital system around it so the brand finally works as an experience.

FOR

Small/medium businesses & NPOs who need a serious digital presence, and want proof, clarity and an easy first step.

The solution is also a demonstration of my practice.

UX / UI

Structure information so a client knows where to look and what to do next.

MOTION

Interaction that communicates confidence and craft not decoration.

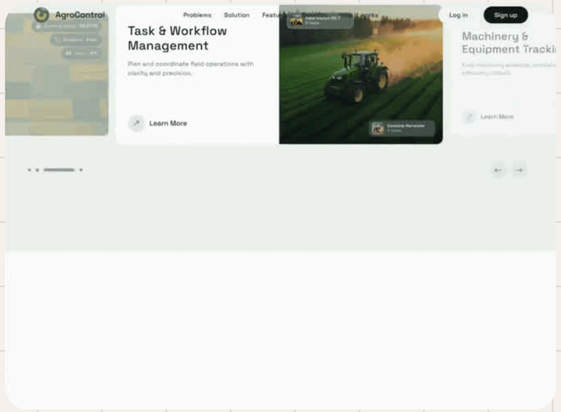

DEVELOPMENT

A real, responsive, deployed product not mockups that stop at Figma.

ONE PROJECT = STRATEGY + UX + VISUAL + MOTION + FRONT-END + REAL DEPLOYMENT

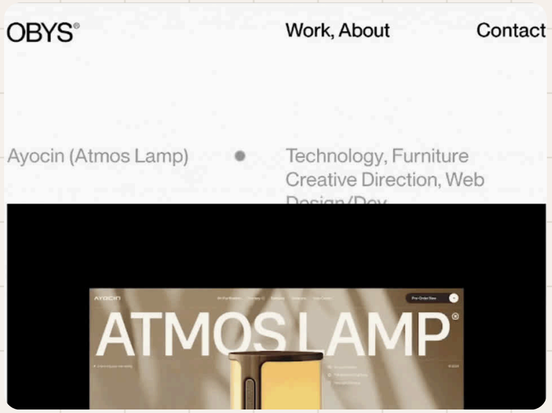

My signature: designed systems that are visually strong and actually work.

References that foreground my intended approach.

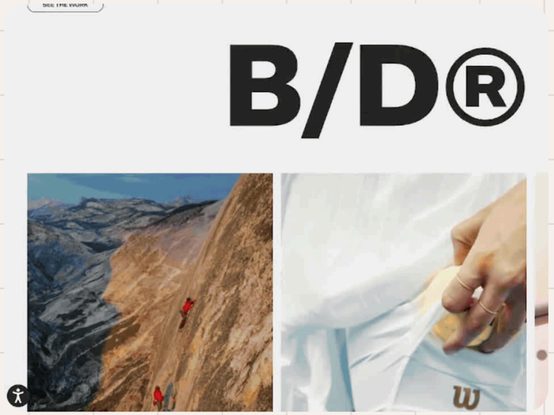

STUDIO SITE MOTION-LED

Why: proof-driven case studies + purposeful motion

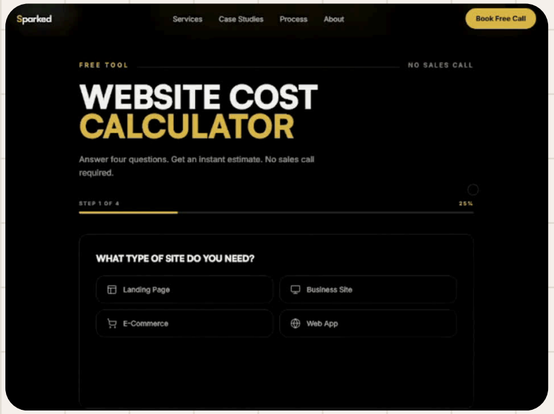

EDITORIAL GRID PORTFOLIO

Why: clarity and hierarchy over decoration

CASE-STUDY TEMPLATE

Why: turns each build into reusable proof

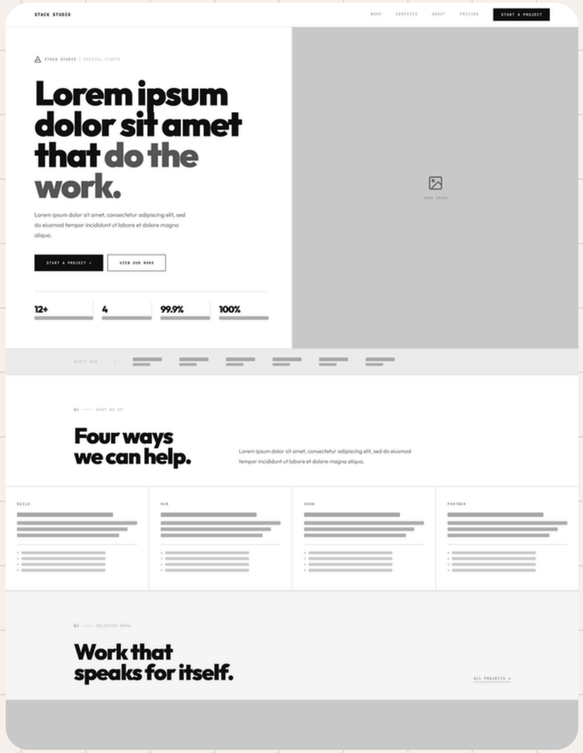

GUIDED ENQUIRY FLOW

Why: low-friction first step, not a raw form

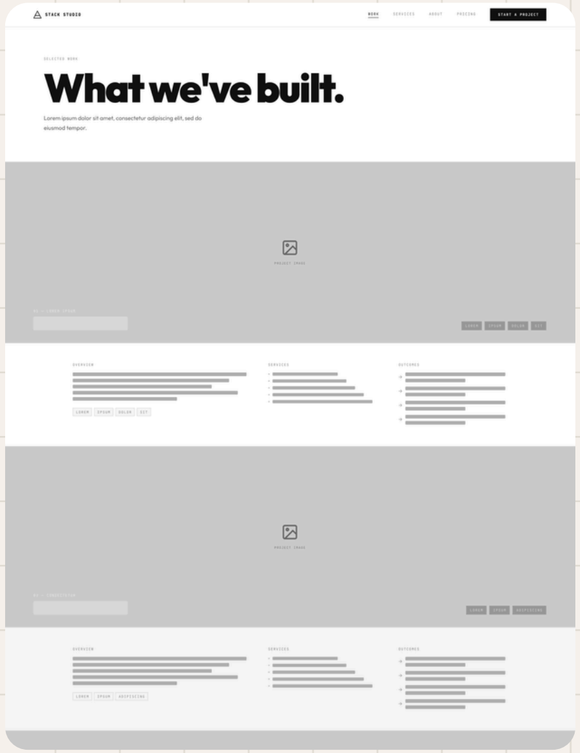

BOLD TYPE | **STACKED BLOCKS** | **EDITORIAL GRID** | **MICRO-MOTION**

Low-fidelity structure for the four key pages.

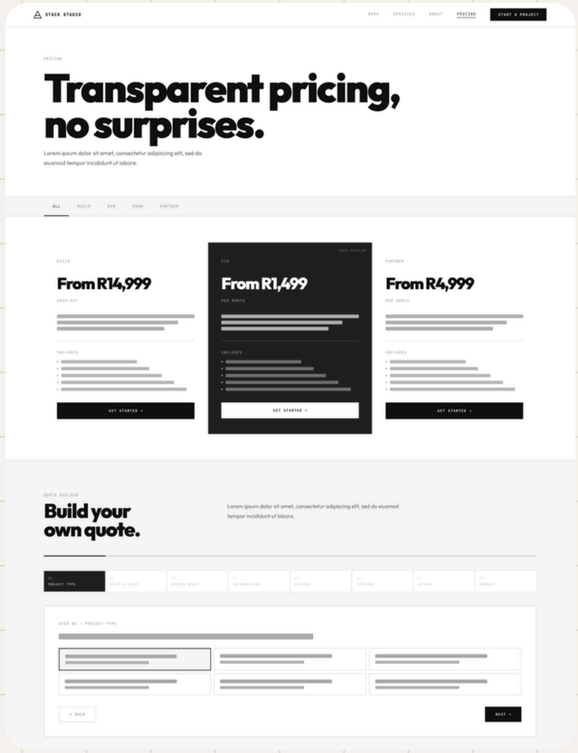

HOME

Hook · proof · services · CTA

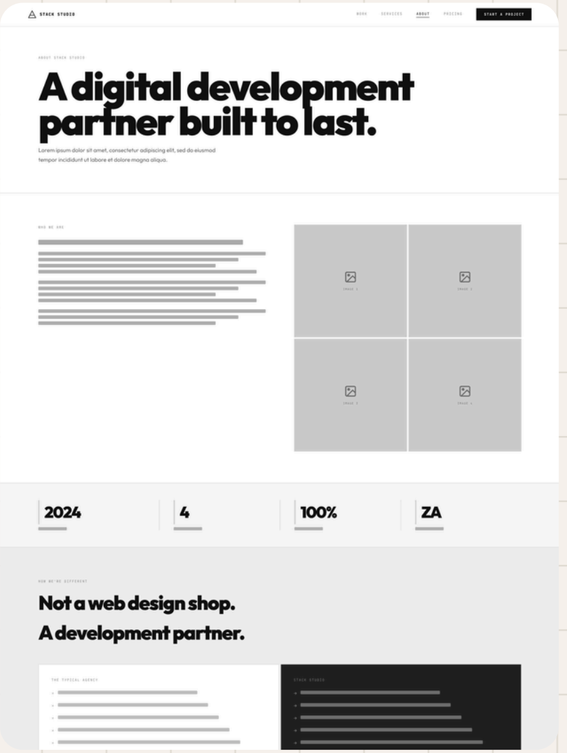

CASE STUDY

Problem → build → result

SERVICES + PRICING

Offer, process, starting price

CONTACT / BRIEF

Short guided enquiry

Tight scope: one polished product, backed by a reusable system.

01 **Responsive website**
Desktop + mobile, deployed live

02 **Case-study system**
Reusable project template

03 **Services + pricing**
Clear offer & starting price

04 **Enquiry flow**
Short guided brief form

05 **Motion language**
Hover, scroll & transition rules

06 **Mini design system**
Type, grid, buttons, brand rules

FORMATS

DESIGN

Figma

BUILD

OUTPUT

GoDaddy

PROOF

GC SOLAR
Smart Energy Solutions

From “we can show you” to “you can see it”.

W9

Research

Services, pricing, site references + sitemap

W10

Design

Final wireframes + hi-fi, desktop & mobile

W11-13

Frontend build

Responsive pages, case studies, quote flow

W14

Motion + interaction

GSAP / Framer Motion, polish

W15-16

Test + launch

Fix, deploy, case study

BUDGET

± R0–R500

Existing tools + free/low-cost hosting; a domain at most.

WHY IT'S WORTH MAKING

It solves a real studio problem, strengthens Stack Studio as a business, and gives me one portfolio piece that shows exactly how StackStudio work.
